

BLOCKAPT PARTNERS WITH SIEGE INTERNATIONAL TO RAISE MOMENTUM GLOBALLY.

BlockAPT announces an exciting partnership with Siege International, the leading private security and military consulting firm.

London, UK – Tuesday 29 March 2022 – BlockAPT today announces an exciting partnership with Siege International, a leading private security and military consulting firm, based in the US.

Siege International was started by military veterans to provide commercial and government entities security and technology consulting, protection, and training. It has taken the best from global intelligence and defence resources and has strong connections with government and commercial organisations to help protect against the increasing cyber-attacks which are more than ever prevalent today.

Siege International's mission is to protect and stabilise businesses and countries globally with minimal disruption. By utilising cutting edge technology to mitigate against volatility, vulnerabilities through cyber-attacks, etc, they have proven to play a key part in the advancement of economic stability and growth for many businesses and government institutions all over the world.

With the increasing cyber threat high alerts and changing risk posture in the current climate, the centrally managed, command and control BlockAPT Platform, enabling a high level of automation and intelligence, will help Siege International deliver a more advanced level of protection services to their existing channels.

Zafar Karim, Co-Founder & CEO of BlockAPT said: "We are truly delighted to work in partnership with Siege International. With Siege International's renowned reputation and impressive background, the BlockAPT Platform will provide them with next-gen technology to support their Intelligence & Protection services to both commercial and government institutions."

Guy Tchoumba, Vice President of Siege International said: "It is a pleasure to partner with BlockAPT, as our trusted cybersecurity and technology partner. They share our values on protecting businesses and government institutions from disruption in these uncertain times. The BlockAPT Platform sets a new standard when it comes to mitigating against risk exposure and we look forward to working with BlockAPT to protect nations globally."
